

Our guide to

Short Term Vending Support

Our promise to you

**Our people
will always be
at the heart of
your vending
solutions**

Supporting you, your people and the UK during busy periods.

We are offering short term vending solutions across our machine range to support you during busy periods.

In times like these, longer hours, more staff and increased waiting times are the new normal.

As The Vending People, a brand with a promise to put our people at the heart of your vending solutions, we want to do our part in supporting you through these uncertain times.

We can help install extra machines on an attractive short-term basis, keep you stocked and supplied, and book an additional Preventive Maintenance Visit to keep pre-existing machines fully operational 24/7.

Our vision is built around you

“To be the UK’s most recommended vending company”

Our vision is simple, yet important. We can only achieve this by giving you the best service we can every day. Which is exactly what we enjoy doing!

Steve McKeown
Account Manager

Leonard Brown
Warehouse Manager

Angela Wareham
Operator

We're here for **your sector**

We understand that every industry may have a significant change in service requirements, some will currently have many staff working from home, whilst others may have short-term surges in demand which requires more staff to be in manufacturing, logistics and healthcare.

Healthcare

"Healthier vending is
our department"

The NHS is getting increasingly busier and becoming a highly demanding environment which, the UK depends on more than ever. Our experience of working with over 30 NHS sites and providing healthy hassle-free vending, gives you peace of mind about receiving an excellent service you can trust and depend on.

Our additional machines can ensure every reception, ward, corridor, waiting area and staff room is equipped to meet the increase in demand for food and drink. We even have dedicated healthy vending machines offering a wide choice of snacks under 150-calories and zero sugar drinks, helping visitors, patients and staff to make healthy choices, day or night.

Industry

"Improving the workplace
since 1960"

Industrial workplaces are tough environments. For vending machines to survive in these non-stop surroundings they need to be strong, resilient and built to last. We already work with many warehousing and manufacturing facilities, so we understand productivity is key. That's why our machines provide the speed and quality needed to keep up with the demands of a large workforce.

Manufacturing

The Vending People understands the importance of a workplace coffee machine to improve productivity. You no longer have to schedule into your day an unnecessary trip to the nearest coffee shop and risk being in a crowded queue.

Delicious and hot coffee is now at your fingertips! Depending on where you choose to put your hot drink solutions, your staff will be able to access coffee without having to wait in line, risking their health taking up those precious minutes in their lunch break.

Distribution & Logistics

Shop shelves are being stripped by panic buyers and stockpiles, forcing more and more to shop online and create long delays for home deliveries. Distribution and logistics companies are as a result feeling the pressure to fulfil the backlog of orders and get supermarkets restocked.

With flexible delivery schedules and early morning starts, your delivery drivers might not have time to brew some coffee at home. Having a coffee machine in your depots means your staff can grab a quick cup on the way to their first task of the day, without skipping a beat!

Additional Machines

As your work force grows to tackle temporary challenges, get the short term benefits of a larger vending capacity, without the long-term commitment. We can provide extra machines that help you cope with an increased demand on catering, with attractive short-term options.

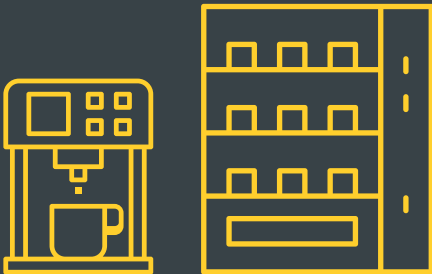

Short term options

Renting: You can pay a pre-agreed amount to use our machines over a set period of time. Once that time has ended you can either extend or arrange for us to collect them.

Free on loan: We can place our machines on your site over a set period of time, at no cost. This does however depend on the profitability of the machine's location, due to The Vending People absorbing stock and maintenance costs.

We can provide additional support to ensure your machine is stocked, clean and fully functioning. All teams are adhering to stringent daily actions, including frequent and thorough hand washing and increased extensive cleaning of our machines, offices and depots.

During these uncertain times, you and your hard-working team want to remain focused on supporting the UK. Our people know their job inside out, love what they do and go that extra mile, giving you peace of mind about receiving an excellent service you can depend on.

Preventive Planned Maintenance

If your pre-existing machines show signs of ageing, we can implement a Preventive Planned Maintenance visit.

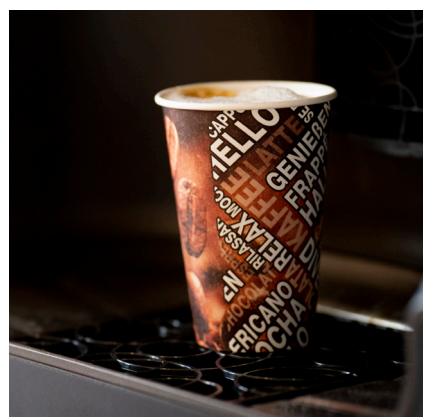

The process will start with a report for each of your machines, giving you insight in to what needs to be replaced in order for the machine to continue functioning, without further disruption.

Our engineer will then order in the required parts and install them into your machines on a pre-arranged date that causes minimal interruption to you and your business.

Shop key products

that can make a difference...

Hot drinks

Being 3-4% dehydrated can lower your work performance by approximately 25-50%. When the UK becomes dependant on several key industries, it's essential to keep everyone hydrated and operating at 100%.

Our Instant and FLAVIA range is the perfect solution when work is busy and time is short, containing the essentials; coffee tea and hot chocolate.

Snack and confectionery

Increased pressure and demand can lead to employees not having the time to make lunch before hand and shifts lasting longer than expected. Having snacks and confectionery available 24/7, can help prevent hunger and keep staff focused.

Everyone tends to have a favourite occasional treat, they can rely on to help them recover. That's why we provide a wide range of the nation's most loved brands.

Disposable coffee-to-go cups

Our disposable coffee-to-go cups enable you to reduce the potential risk of cross contamination during uncertain times.

The coffee-to-go range can be used with machines that have cups sensor technology, recycled through recycling schemes and allow individuals that frequently move between departments and sites to stay hydrated and energised.

...Re-stock with our care packages.

Bespoke care packages

In the current climate you may be experiencing temporary difficulty when obtaining certain products, you and your people depend on. If your normal channels are backed up or struggling to fulfil orders, our people are here to support with tailor made care packages that keep you stocked, and your people cared for.

The Vending People will work with you to identify what's missing and build a bespoke care package that meets your needs and keeps you stocked on items you're struggling to source. Your package can contain but not limited to cold drinks, hot drinks, cups, snacks and confectionery.
