

We're pleased to inform you that C the Signs has been recommissioned by North West London ICB to support cancer detection for the next four years.

You may have already received a letter from Dr. Lucy Hollingsworth, NWL Primary Care Cancer Lead, confirming that C the Signs is now the preferred platform for urgent suspected cancer referrals and cancer safety netting in NWL. You can view the full letter [here](#).

### **Why use C the Signs?**

- **Early Detection:** The platform helps clinicians identify cancer at the earliest possible stage, supporting faster diagnosis and treatment.
- **Simplified Referrals:** Integrated with EMIS and SystmOne, it streamlines the referral process, accessing the latest version of your local referral form, reducing admin.
- **Safety Netting:** Robust automated safety netting ensures no patient is lost to follow-up, with built-in reminders and tracking.
- **Managing Your Cancer Registers:** Manage cancer care reviews and FIT result processing to maximise achievement across QOF and the IIF.

### **Getting Started**

To access C the Signs, please contact your practice manager, or contact C the Signs directly at [support@cthesigns.net](mailto:support@cthesigns.net), for your login credentials. These easy set-up guides are here to help:
