

Inviting all PCN and Practice staff... Streamlining Practice Workload with JOY

We're excited to announce upcoming demo and training sessions for JOY Connect, the new upgrade to the referral platform which will soon be rolled out across NWL primary care.

These sessions will give clinicians a chance to:

- See how JOY Connect works in practice
- Understand how it integrates with EMIS and SystmOne
- Learn how it supports easier referrals and signposting to local services with fewer clicks

We'll also cover the JOY Marketplace and how practices can make the most of the platform to improve patient access and reduce admin.

All clinicians and practice staff are invited to join, hear more about JOY and ask questions.

Practice managers, don't miss out these upcoming sessions, select a link and share it in a practice email/invite with your colleagues, so you can choose to join a particular session together if preferable.
