THE COMPLEX CANCER LATE EFFECTS REHABILITATION SERVICE

Bath National Pain Centre

In partnership with

In partnership with

**A NATIONAL SERVICE FOR PEOPLE
LIVING WITH PAIN-RELATED
COMPLEX CANCER LATE EFFECTS (CCLERS)**

Funded by NHS England

WHO ARE WE?

National service providing specialised rehabilitation for adults experiencing persistent pain and reduced physical function following chemotherapy, radiotherapy, or surgery treatment for cancer.

WHAT DO WE OFFER?

Our internationally recognised and therapist-led team specialises in non-medical management, focusing on improving function and empowering people to manage their condition well and improve their quality of life. Our team includes a pain consultant, physiotherapists, occupational therapists, a health psychologist, and a clinical nurse specialist.

BATH NATIONAL PAIN CENTRE

Bath National Pain Centre is a leading provider of NHS specialist pain rehabilitation in the UK, offering multiple treatment packages.

We support patients of all ages, from childhood to older adulthood, including those with complex care needs. Delivered in purpose-built modern facilities, our residential programmes are designed to reduce pain-associated disability and minimise the impact of pain on a person's life.

We have highly-specialised programmes for specific patient groups, including Children and Families, Young Adults (18-25), Severely Affected adults, Complex Regional Pain Syndrome (CRPS) and Post-Cancer Treatment (Late Effects) pain.

Our research-active centre is committed to advancing pain rehabilitation practice.
