

North west London Cervical Screening Clinical Template Updated

The cervical screening template for SystmOne and Emis has been updated to reflect recommendations from the national guidance. This ensures:

- Accurate coding and data collection to support targeted population health management
- Accurate and concise documentation of discussions during consultations and results management
- Easier options for recording call and recall options (verbal, SMS, letter, email)
- Accessible links for professional and patient resources

SystmOne practices will be able to access the template via **Autoconsultations > 02 Nursing & HCA > NWL Cervical Screening (Cytology Smear) 2025/26**

OR Autoconsultations > 15 Obstetrics and Gynaecology > NWL Cervical Screening (Cytology Smear) 2025/26

EMIS practices will be able to access the template via **F12 > NWL F12 Template Launcher > Obstetrics & Gynaecology > NWL ICS Cervical Screening (Cytology Smear) 2025/26**

This will be made live for SystmOne and Emis practices on **Monday 7th July**

This work has been led by Sarah-Jane Knight (NWL ICB Clinical Systems Development Manager) and Narinder Sinclair (NWL ICB Primary Care Quality Improvement Manager), who undertook a series of discussions with General Practice Nurses and Clare Jarman (GP Clinical Lead - Gynaecology, Sexual Health and HIV). This has also been demonstrated at the local Borough IT meetings (DDaTs).

If you have any questions or comments, please email the NWL IT Service Desk on **nhsnwl.servicedesk@nhs.net**, or call 020 3350 4050.
