

Launch of MMR Community Pharmacy pathfinder sites

As some of you will be aware, NHS England have given the go ahead for each London ICB to test Community Pharmacy delivery of opportunistic MMR vaccination at a number of pathfinder sites in each borough to increase access and support uptake rates. These locations have been selected based on the best available data on recent measles cases following the pan London outbreak and cross referenced this with CHIS data on local unvaccinated populations.

Following internal and on-going external assurance processes we now have an initial list of 13 Community Pharmacy pathfinder sites across NWL who will be offering MMR vaccination to 5-19 year olds. These sites will be offering vaccination on an opportunistic basis, but practices can refer patients who have previously refused if they think this would help support uptake.

These sites are starting to go live with the aim of all sites being active in the next two weeks.

The 13 MMR Community Pharmacy pathfinder sites are as follows:
