# GP Forum - PCN Presentation

2025

# Introduction

- Harrow Health have been established for 17 years
- Range of services, with most very local to the Hillingdon population.
- **Very very** short wait times – often just a few weeks.
- All services available on ERS – We accept any referral form
- All services are consultant led
- On site diagnostics, including Nasoendoscopy, audiology, ultrasound, elastography

# are different

---

1

## Short Waiting Times

We establish contact with the patient within 72 hours. The average waiting time to see patients in face-to-face clinic is within 4 weeks.

2

## Easy to Refer

Easy referral process for referring GPs through e-Referral System (e-RS). We have strong support network to help resolve troubles and provide e-RS training.

3

## One-stop Clinic

Aim to provide one-stop service to patients. We coordinate between specialists, labs and support staff to ensure service is streamlined.

4

## Consultant Led Service

Clinics are led by experienced consultants who take the lead to ensure comprehensive patient care.

5

## Language Support

We offer support if required for language barriers during consultation by booking language interpreters or for sign language.

6

## Follow up Care

Our dedicated team ensures patient's follow up care if required. Patient always receive a choice between attending face-to-face appointment or virtually.
