

## **Free webinar: Save money on your energy bills through retrofit solutions**

The London Estates Delivery Unit is hosting a [free webinar](#) to help London GP practices understand how they can cut energy costs and reduce carbon emissions through building retrofit and green energy solutions.

With energy costs rising and net zero high on the NHS agenda, GP practices are under increasing pressure to cut costs while reducing their carbon footprint. However, improving your practice's energy efficiency can be simpler and more cost effective than you think.

Sign up for our free webinar to learn how solar power and LED lighting can help lower your energy bills and improve the efficiency of your premises. During this session we will break down what retrofit means for primary care, explore real-world case studies, and provide you with financing and procurement options to make these solutions accessible, with a focus on funding options that require no upfront investment.

The session will include:

- **What retrofit means** and why it matters for your practice
- **Real-world case studies** from GP practices already benefiting from retrofit solutions
- **Funding and procurement options** to make upgrades affordable and accessible
- **Business tax and energy relief schemes** that could make your investment more cost-effective
- **Lowering costs** with green energy tariffs and smart purchasing strategies
- **Strategies for different ownership models**, whether you own or lease your premises

**Date & Time:** 08 April, 1-2pm

**Location:** Online (link provided upon registration)

This session will run for 60 minutes and is designed to be clear, actionable and time-efficient, with expert speakers and practical takeaways to help your practice save money while becoming greener.
