

HPV Self-Sampling for Cervical Screening (SelfScreen) Pathway – EMIS Tools

The following EMIS tools for the HPV Self-Sampling for cervical screening (SelfScreen) pathway are available for you to access within your EMIS system.

- clinical template:  HPV Self-Sampling (NHSE London) v3.0
- protocol:  HPVSS v2 24-49 eligible
- protocol:  HPVSS v2 50-64 eligible
- searches

The clinical template and protocols are published via Resource Publisher so you do **not** need to import them into your EMIS system.

They have been published as **inactive** items so **you will need to activate each of them**.

Activating the Template and Protocols

This needs to be done just once by one person in the practice.

If others are logged into EMIS at the time, they may need to log out and in again for the activation to take effect for them.

- 1) From the EMIS homepage, click on the EMIS ‘ball’ (in top-left corner of screen): 
- 2) Hover over ‘Configuration’, then click on ‘Resource Publisher’
- 3) In the ‘**Protocols and templates**’ tab (near bottom-left corner of screen), locate the HPV SS tools (the 1 clinical template and 2 protocols listed above), here:

 NCL /  HPVSS-London

- 4) For **each** of the 3 tools: right-click on the tool, hover over ‘Status’, then click ‘Activate’

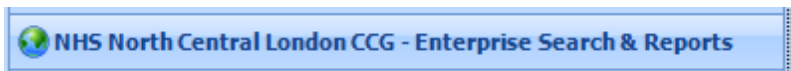

Please note: If your practice previously participated in the ‘YouScreen’ study, you will also need to **de**activate the following protocol in your EMIS system if it is still active:

“  YouScreen - Print Lab Consent Form Protocol_V:...”

Searches

The searches are available within Population Reporting, via the tab:

within the folder:

Alerts Messages

Below is a summary of the alerts messages which appear for relevant patients in the bottom-right corner of the EMIS screen:

Status	Detailed text if hover over alert	Alert
Eligible, 6m overdue & No offer	"Patient is due for Cervical Screening and is eligible for HPV Self-Sampling"	
Offer coded but no outcome ie either declined or result	"Cervical HPV self sampling has been offered but no outcome coded"	
Offer declined coded not subsequent code	"HPVSS Latest code entry was Declined"	
Latest result code is HPVSS positive	"HPVSS Positive Result - Requires screening by clinician"	
Latest result code is HPVSS inadequate	"HPV Self-sampling result was inadequate - if 1st HPVSS inadequate repeat self sampling. If 2nd screen by clinician."
