

Lipid Management in Primary Care – Recent Updates on November 26th with Dr Mohammed Haidar and Dr Jai Cegla

On behalf of **Dr Mohammed Haidar** (NWL ICS Clinical Lead for Cardiovascular and Renal Disease), we would like to invite you to the upcoming CVD webinar on “**Lipid Management in Primary Care – Recent updates**” on **Wednesday 26th November 1-2pm**. In this session, we will focus **NWL Lipid Guidelines** ensuring alignment with current standards of care, and the associated novel therapies. You will also hear real-life experience from **Dr Jai Cegla** (Consultant in Metabolic Medicine, ICHT & NHS England clinical advisor). We will also provide an update on the **25/26 QoF, Inclisiran reimbursement changes** and **Medicines Mangement and Optimisation** focusing on how these frameworks impact lipid management. You will have the opportunity to put your questions to NWL clinicians in a Q&A chaired by Dr Mohammed Haidar.

[Please click here to register for the session.](#)

Feel free to circulate this invite to other colleagues who may be interested.

Please note: This session has been designed to complement—not duplicate—the [Cholesterol Awareness Month](#) webinar taking place on 6th November, hosted by the North London Cardiac ODN. If you're interested in both topics, we encourage you to register for each event separately.

We hope to see you there.
