

Are you or someone you support affected by mental health, neurological, or chronic pain conditions?

WE WANT TO HEAR YOUR THOUGHTS ON

Neuromodulation (Non-invasive brain stimulation)

WHAT IS THE SURVEY ABOUT?

We are interested in your initial impressions of neuromodulation (non-invasive brain stimulation) techniques for the treatment of mental health conditions.

WHAT IF I DON'T KNOW ANYTHING ABOUT NEUROMODULATION?

You do not need to have knowledge or experience of neuromodulation techniques. You will watch three 90-second information videos and read a short infographic before answering some questions.

WHY SHOULD I TAKE PART?

Your responses will help us understand how to better support and inform patients and carers in future neuromodulation research and treatment.

**TAKE THE SURVEY
HERE**

Survey closes on
31 JULY 2025

It takes only 15-20 minutes
Your responses are anonymous
